Fri.

Dear Mr. Mitzfelft,

I am currently visiting this beautiful state of New Mexico. I find it devastating that there are no regulations for radioactive emissions.

We must think of our posterity & the future of our planet's environment. Our children's children deserve to live in a clean, healthy environment.

I demand that EID issue an emergency order (by authority of the New Mexico Air Control Act, section 74-2-10) to prevent the burning of radioactive waste until the State of New Mexico can adopt standards in a public forum to regulate it. I demand that any hearing relating to the incinerator should include both the hazardous waste and radioactive permits. Please don't let our air quality be compromised. We can't hide from air.

Sincerely,  
Helen Atma Kaur
