

Dear Mr. Mitzelfelt,

7-11-89

I'm greatly distressed to read that radioactive waste may be burned at the LANL incinerator. I fear for the health of all the inhabitants of the Rio Grande Valley. It is impermissible that incineration should occur before the public has been given the chance to insure ^{that} standards for regulation are in place. Please enact an emergency order to halt the burning of radioactive waste and insist that all hearings about the matter include all waste materials.

Signed DANA E. HEES - Santa Fe resident
