RECEIVED  
JUL 19 1989  
EID DIRECTOR'S OFFICE

Dear Richard Mitzelfelt,  
I am writing you in regards to  
to the incinerators being installed in  
Los Alamos.

Since we already know that any  
burning produces chemical by products that  
contribute to toxic rain, I'm amazed that  
incineration is allowed at all in this state.  
We are one of the few remaining  
areas that has semi-clean air.

The air is not only at stake since  
the chemical by products that fall in  
rain will destroy the water sheds in  
affected areas.

The air has been getting increasingly  
poor since we have not taken measures  
to maintain its purity. As a native  
Santa Fean I have watched the changes  
occur.

I hope you take action to prevent  
any burning of any waste in this state  
whatsoever!!

Sincerely  
Mary Kathleen Cho
