Michael HORAN's Question

Q: Under RCRA is the current federal particulates limit of 0.08 grains per dry standard cubic foot being tightened to a limit of 0.01 in a new draft promulgation as the particulate emissions from the LANL DRE TESTS exceed this new limit.

Source: Air Resources Board in Calif. on July 19, 1989.

IT is the ARB's understanding that the new limit will be imposed in the near future.

Bottom Line: The LANL incinerator would exceed this limit as communicated by Mr. Crossman to Mr. Horan as results of the DRE tests.
