EID
1190 St. Francis Dr.
Santa Fe, NM 87503
Att: Richard Mitzelfelt

Subject: Los Alamos incineration of hazardous & rad- wastes.

Dear Mr. Mitzelfelt,

I have just learned through information received from the NM Conservation Voters Alliance that Los Alamos is incinerating hazardous & radioactive wastes without any state oversight. I presume they are doing so under DOE authority?! Given the infamous DOE record on such matters, & given what we now know of the dangers of toxic incineration, how can the state sit blind to it?

It would be a good move (& as a citizen I demand it) to:

1. (EID) issue an emergency order to prevent the incineration of rad wastes until the state can adopt standards in a public forum to regulate them,
2. hold hearings on this issue that include both hazardous waste & radioactive permits.

Please send me a response on this.

Best Wishes,

Ross
