Dear Mr. Yungblood:

Congratulations on your excellent work as being the moderator at the recent Santa Fe public hearings concerning the Los Alamos incinerator start-up.

The recent reports of the Environmental Improvement Division of the State of New Mexico and the efforts of Rep. Bill Richardson in getting a bill through Congress to delay the start-up until proper safety regulations are met, led me to believe that you made sure that the "powers that be" were given the statements of Santa Fe residents' concerns about the LANL procedure.

As a recent listener and observer at these hearings I was able to detect the sincerity and personal integrity of those who conducted the meetings. And a thank you for your efforts in trying to protect the health and well-being of people in this area. Teresa Sheehan
