95 NOV -3

Dear Mr. Honker:

8604

This is a quick note supplementing my comments made orally regarding the computers, incinerators, and proposals of the Los Alamos National Laboratory "trash" problems. In particular I should note LANL makes no claim that someone at the Massachusetts Institute of Technology's Tokyo Branch Office (Not to mention IBM's Thomas Watson center or some prankers from West Germany... has, or has not, deliberately or not caused their computers, caused every computer to lie, deceive, harm you, me, themselves, anyone human... I can assure you Mr. Honker there are even some computer technicians who argue that their machines ~ their computers ~ "have got to have constitutional rights just like humans do" ~ but it is more how these technological drunkards (as I accurately label Albert Einstein, Adolph Hitler, Edward Teller, Niels Bohr, Robert Oppenheimer, Richard Graves, the whole mob of ~ please excuse my language ~ people in the words of a magazine article some of the

nuclear establishment heralded as "a real win"
are "arrogant" and failed to mention, for example, just
How arrogant - Einstein, for example, often required of
others to say Einstein is GOD. Do Mr. Einstein can
"judge" what you have to say, or even what you "think"
without even bothering to find out by asking anyone
beforehand - recall he has "reasoned" to be GOD so he
doesn't have to deal with anyone else if he doesn't
want to, apparently is his way of doing his business
regardless if his mob of cohorts decide what chance
they'll blow the world's atmosphere off the planet.
And where computers are created machines in the views
of those "people" involved with them the very names that
nuclear scientists give nuclear bombs - TRINITY, TRI-
DENT, PLUTONIUM - it is clear what these people wor-
ship. And I have it by good authority that these
people even have the audacity to say stars shine
by the same means used as stars - yet when I
asked where is those children they took me for a fool
which they clearly are.

Thank you for your time.

Sincerely,
Richard Deyo
