Discussion

Asked Mr. Soden if the DOT response to our letter of 9/28/86 requesting information of the CAI at LADL was en route or where. She said some men from HQ was in yesterday and told her that the letter had not been signed because someone wanted more information put in the cover letter. I told her we had issued the permit without that information and that we were being criticized for doing so. She said she would get this information to us, also asked if they had given her any information as to when the letter would be sent. She said that she would find that out and thanked us for our patience.

Conclusions or Agreements

She will get back with me as to when the letter may be mailed
