Santa Fe, New Mexico 87502

Dear Mr. Kelly,

On behalf of the Controlled-air incinerator staff, I would like to thank you for the opportunity to explain the CAI and its capabilities during your March 31 tour. We personally look forward to future interactions with NMED to ensure that the CAI becomes an important tool in meeting Los Alamos National Laboratory's regulatory responsibilities while providing an appropriate level of human health and environmental protection.

The staff at the CAI would also like to extend an open invitation for you or any other interested individuals within your organization to tour the facility at your convenience. If you would like to arrange an additional tour or if you have any questions regarding the information provided to you during your past tour please contact me at 665-4686.

Respectfully,

Kathy Elsberry
Group Leader, CST-16
