Re: Response to the Request for Additional Information to the NOD Response for RFI Report
for PRSs 50-004(a, c) and 50-011(a) in TA-50 (Former OU 1147)
Los Alamos National Laboratory (NM0890010515)

Dear Mr. Garcia:

The Environmental Protection Agency (EPA) has reviewed additional information dated June 13, 1997, sent by Los Alamos National Laboratory (LANL) to supplement the RFI Report for Potential Release Sites 50-004(a, c) and 50-011(a). NFA Criterion 5 appears to have been met for all three sites, as available data indicates that RCRA-regulated contaminants pose an acceptable level of risk under current and projected future land use. EPA recommends removing these sites from the LANL RCRA/HSWA operating permit.

Should you have any questions, please feel free to contact Mr. David Vanlandingham at (214) 665-2254.

Sincerely,

David W. Neleigh, Chief
New Mexico and Federal Facilities Section
