Hi Vickie. Pursuant to John Young's voice mail message to me on Friday, May 23, 2003, and our telephone conversation this morning, the LANL RRES-R Program will add strontium-90 to the analytical suite for the supplemental RFI samples to be collected from SWMUs 50-004(c) and 50-011(a) as referenced in the May 22, 2003 Sampling Notification letter (ER2003-0366). Results will be reported in a future RFI report. This was an oversight on our part. If you have any questions or require any additional information, please call me at 665-2198. Thanks.

Paula Bertino
