View As Web Page

Gentlemen,

To accommodate future building activities at TA-53, we have moved the proposed location for well TA-53-1(i). The original location can be found in the attached workplan map and the new proposed location is labeled "4" on the attached file TA53-1(i).pdf. This is not a large shift in location; however we wanted to give you an opportunity to comment before we proceed. Please respond to this e-mail with your concurrence or give Danny (667-6333) or me a call to discuss.

Thanks,

Mark Everett, PG

Mark,

This email serves as NMED approval for the change in drilling location for intermediate well TA-53-1(i) as proposed in the figure attached to the original email received by NMED on January 14, 2009 at 7:07 am. NMED understands that LANL will provide the results of preliminary sampling and any proposed modifications to the well design proposed in the above-mentioned email and this email below as soon as such information becomes available. Thanks.

Michael
