Los Alamos, NM 87544

Ms. Alison Dorries, ENV Division Director
Los Alamos National Security, LLC
Los Alamos National Laboratory
P.O. Box 1663, MS K404
Los Alamos, NM 87544

SUBJECT: Spill Response Assessment and Closure of Release ID# 2014-382 occurring at Technical Area (TA) 53-35 on May 22, 2014

Dear Mr. Turner and Ms. Dorries:

On May 23, 2014, representatives of Los Alamos National Security, LLC (LANS) verbally reported an unauthorized discharge to the New Mexico Environment Department (NMED) Ground Water Quality Bureau (GWQB) as required under 20.6.2.1203 NMAC of the Water Quality Control Commission (WQCC) Regulations. The report identified a discharge during housekeeping activities which involved moving a chiller/cooling bath from TA-53-35 to an adjacent parking lot (Release ID# 2014-382). The incident resulted in a release of less than one gallon of Dynalene HC onto the concrete floor in TA-53-35 which continued to flow outside onto the asphalt parking lot and a small patch of soil adjacent to the parking lot. The release was contained on the asphalt and soil areas. Los Alamos National Laboratory (LANL) reportedly used absorbent on the release upon discovery and covered the impacted area with plastic until additional absorbent and impacted soil was removed.

Based on information submitted by LANS, corrective actions for this unauthorized discharge have been completed in a manner that is satisfactory to the GWQB. No further action is required at this time for release ID# 2014-382.

NMED reserves the right to require additional corrective actions should this incident result in the degradation of ground water quality. Further, nothing in this letter shall be construed as
