Dear Ms. Johnsey:

This document is being submitted in accordance with the requirements of the National Pollutant Discharge Elimination System (NPDES) Permit No. NM0030759 for Los Alamos National Laboratory, issued to Los Alamos National Security, LLC, and the U.S. Department of Energy, effective November 1, 2010. As specified in Part I, Section E.2.(a):

Analytical results from confirmation sampling show pollutant concentrations for all pollutants of concern at the Site to be at or below applicable target action levels [TALs].

Enclosed is the certification that corrective action is complete following analytical results below TALs from two confirmation samples collected from two measurable storm events occurring at least 15 days apart for Site 53-008 within LA-SMA-10.12. Table 1 below identifies the Site, site monitoring area, baseline sample collection date, and corrective action sample collection dates applicable to the certification. The certification that corrective action is complete was prepared in accordance with 40 Code of Federal Regulations 122.22(b). This letter and certification can be accessed at the following website: <http://www.lanl.gov/community-environment/environmental-stewardship/protection/compliance/individual-permit-stormwater/index.php>.
