TRANSMITTED TO ALICE BARR BY FACSIMILE MARCH 20, 1992, 10:45 AM

M E M O R A N D U M

TO: File
FROM: *ves* Bruce Swanton, HRMB Technical Group Supervisor
THROUGH: *720* Teri Davis / *Dk.* Danny Katzman
DATE: March 20, 1992
SUBJECT: List of sampling parameters for TA-53 lagoon

In reference to a telephone conversation between myself and Alice Barr this morning, the question arose as to whether TSG staff had accepted the listing of parameters proposed for next week's sampling of the TA-53 lagoons. With respect to language in Section 3.1 of the TA-53 Part B Permit Application dated July 1991, HRMB confirms that it finds the listing of parameters to be evaluated in the upcoming sampling event to be acceptable provided that the analysis of sludge samples include all HWMR-6, 40CFR §264 Appendix IX metals. HRMB interprets the application to state that the listing of "TAL metals" [Total Analyte List] is identical to that of the Appendix IX metals; thus, analysis of all samples for TAL metals will include all Appendix IX metals.
