REPLY TO
ATTN OF: LAAMEP:9ET-001

SUBJECT: NMED Review of LANL's Notice of Deficiency (NOD) Responses for TA-53
Surface Impoundments Closure Plan

TO: Jorg Jansen, Project Manager, EM/ER, LANL, MS-M992

On April 30, 1996, LAAO received the attached NODs for the TA-53 Surface Impoundments Closure Plan. The NODs are the result of the New Mexico Environment Department, Hazardous and Radioactive Materials Bureau (HRMB), review of LANL's prior responses to NODs dated August 31, 1995. NMED has noted a few remaining deficiencies which must be addressed. One primary remaining point of disagreement is the use of the appropriate exposure scenario for clean closure. This issue, as LAAO understands it, will be addressed in a separate meeting with NMED, date to be determined.

LANL's responses to NMED's deficiencies and pertinent parts of all previous NOD responses must be compiled into a complete, final Closure Plan amendment and submitted to NMED within 20 working days. Submittal of the amended Closure Plan is therefore due to NMED on or before May 29, 1996.

If you have any questions or concerns, please contact Everett Trollinger of my staff at 667-5801.

Theodore J. Taylor
Program Manager
Environmental Restoration Program
