Mr. John Kieling
New Mexico Environment Department,
Hazardous and Radioactive Materials Bureau
1190 St. Frances Drive, P.O. Box 26110
Santa Fe, New Mexico 87502

Dear Mr. Kieling:

SUBJECT: Transmittal Of MPF-1 Data

I am transmitting the attached documents in response to the Hazardous and Radioactive Material Bureaus (HRMB's) request for copies of Waste Profile Forms and supporting data associated with the sump and holding tank located in the basement of TA-53-1 (MPF-1). This request was made by members of your staff at the May 19, 1999, monthly meeting between HRMB and the Los Alamos National Laboratory (LANL) Environmental Restoration (ER) Project and discussed in further detail at the monthly meeting on June 16, 1999. A summary of this information was also presented at the June monthly meeting and documented in a letter from the ER Project dated June 24, 1999. This letter also indicated that your request would be forwarded to LANL's Hazardous and Solid Waste Group since the sump and tank were not included as part of the Resource Conservation and Recovery Act (RCRA) Facility Investigation (RFI) and Sampling and Analysis Plan (SAP) for the TA-53 Surface Impoundments.

The enclosed documents only represent information that has been located as of this date and may be limited in their coverage of the operation of the MPF-1 units. ESH-19 will continue its search for additional information that may be available regarding these units and we would like to meet with interested HRMB staff to discuss the enclosed information and any additional information in further detail.

If you have any questions or concerns, please feel free to contact Alex Puglisi at (505) 667-4882.

Sincerely,

A handwritten signature in black ink, appearing to read "Aden Jackson".

Aden Jackson
Hazardous and Solid Waste Group

4516

R

Mr. J. Kieling
