REMARKS:

Darlene: Attached is a map illustrating the safety buffer for the LANSCE facility in TA-53. It is the arc on the map. Tract A-7 lies to the north of the buffer area, across the highway, and between the highway and the airport right-of-way.

[Note: For your information, the two concentric circles are buffer areas for the TSFF facility in TA-21.]

I will provide in early January a detailed schedule of ER products required for land transfer.

Thanks for meeting with me yesterday,

Ted
