Office of the Assistant Director for
Classification and Security
Disposition of Classified Waste Material

ADCS-11029

Reference is made to our memoranda and to your latest memorandum dated April 28, 1959, relating to the above subject.

SP-2 personnel will hold classified waste objects in existing security areas until H-1 has advised them that a bulldozer will be at Mesita del Buey at a given hour on a given day for covering operations. SP-2 will make the necessary arrangements to transport the classified objects to Mesita del Buey and the objects will be covered essentially immediately. The material and/or objects will be buried at least three feet under compact dirt. With the present controls for admittance into the pit areas, it appears that this depth would be adequate.
