

OFFICE MEMORANDUM

131

TO : Charles Reynolds, Eng-4  
Through : Dean Meyer, Group Leader, H-1  
FROM : John Enders, H-1  
SUBJECT: Request for additional pit space and disposal wells  
SYMBOL :

DATE: 3/30/65

0951  
TA-54

Would you please arrange for a Site lay-out for disposal wells to be located in Area G southeast of pit #4? There is enough space available for about five years usage in this Area. This request is based on the assumption that we will close out Area C when the remaining disposal wells are filled. As of this date, we have five wells (3' diam.) and seven (12" diam.) cement lined wells left.

*Call to Russ  
at 3/31/65*

There is also a need for planning a new disposal Area and disposal pit as the presently used pit (pit #3) will probably be filled in six months. Pit #4 is being used for disposal of contaminated building debris and it will probably be filled with this material (from DP Laundry and TA-45).

An access road to the new disposal wells in Area G would have to be kept in mind when laying out the new disposal Area.

*Letter to Russ about hole lay out area G - 5/5/65  
John Enders*
