Subject: DISPOSAL OF RADIOACTIVE CLASSIFIED WASTE

Symbol : SP-2

ENG-DO

JUL 7 1965

Effective July 6, 1965, all waste materials that are both classified and radioactive will be disposed of in the SP-2 classified shaft disposal location, Material Disposal Area H, Mesita del Buey.

As you are aware, this area has, until now, been restricted to the disposal of clean classified material or classified material that is considered to be contaminated with high explosives. As of July 6, 1965, H-Division has agreed that Area H can be used for the disposal of waste materials that are both classified and radioactively contaminated. Mr. Dean Meyer, H-1, has specified one exception. Classified objects that contain gram quantities of fissionable materials cannot be placed in this location; other disposal methods will be arranged in these instances.

As in the past, all of these classified radioactive disposals will be coordinated with H-1.
