Would you please write a work order to have the exposed trash in pit #4, Area G, covered? This will be the final cover and will require about three feet of dirt over trash in the pit. Also, the exposed trash in pit #5 should be covered at this same time. The CMR Bld. Section, H-1 Group, should be notified at least a day in advance of planned work in order to provide Health Physics Surveyors for this work.

In the very near future, I have been informed that there will be some material delivered from Omega Site and TA-42 which will require immediate covering upon delivery to pit #4. It is possible that both of the covering jobs could be scheduled together.
