COVERING OF CONTAMINATED WASTE DISPOSAL PIT

H-1

Attached is a request to cover material in Pit 5, Area G, Mesita del Fuego. In my opinion, the two-week time limit is realistic. I personally inspected the area on February 27, 1969, and not only are we short of space, but we would have a problem if the material in the pit should burn. On January 13, 1969, we put 15 drums of uranium chips in the area. Experience has shown that unless covered, these are a good source of fire.

I would appreciate anything that can be done to expedite this request.
