

OFFICE MEMORANDUM

TO : John W. Enders, H-1 Section Leader

DATE: April 11, 1969 141

FROM : C. O. Martinez-H-1

SUBJECT: Cement capping of Disposal Wells

SYMBOL : H- 1 CMR

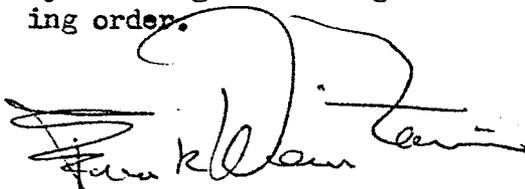

1577
TA 54

Please be informed that on the above date Frank Weinstein and I cement "capped" two holes at Area "G" TA 54. These holes were 8 and 9. Each of these holes took eight bags of cement to fill.

A total of 16 bags of cement were used and this leaves 6 bags which were stored at this site inside the trailer which we have out there for storage. C

These operation took three hours for two men or six man hours to complete it.

We did not used the "Cement Mixer" We mixed the cement in the wheelbarrow since we only had to cap two holes thus saving some time by starting the Onan generator and having the "Cement Mixer" in working order.

Frank Weinstein

C. O. Martinez
