SUBJECT : NEW DISPOSAL PIT AT AREA G

SYMBOL : H-7A-76-35

MAIL STOP: 517

We presently are preparing to have a new pit, pit 13, dug at Area G. The decision to dig this pit was a rather sudden one based upon the continuation of TA-1 excavation and the rapid filling of pits 20 and 24. The new pit was surveyed and staked last week, and digging will begin in the very near future. Please check to see that this pit meets all appropriate criteria so that a "go ahead" on the digging can be given. The new pit likely will be used for Pu-waste disposal.
