OFFICE MEMORANDUM

TO : M. A. Rogers, H-8, MS-737
M. L. Wheeler, H-8, MS-737

DATE: 2 September 1976

FROM : J. L. Warren, H-7

JLW

SUBJECT : NEW 6' DIAMETER SHAFT = Shaft 96

SYMBOL : H-7A-76-70

MAIL STOP: 517

Along with the 15 2' and 3' diameter shafts we presently are having drilled, we have decided also to have a 6' diameter by 50' deep shaft drilled in the Area G shaft field. We would like to have this shaft located in the line with the other 6' shafts, just to the south of shaft 70. This will be a "multi-use" shaft, used for disposal of all wastes (excepting tritium) requiring disposal in a shaft but which are too large for our smaller shafts.

If you have any questions, please call.
