JUN 13 1992

Mr. Edward Horst  
Program Manager  
Radioactive and Hazardous Material Bureau  
New Mexico Environment Department  
Harold Runnels Building  
1190 St. Francis Drive  
Santa Fe, NM 87502

Dear Mr. Horst:

The Los Alamos Area Office (LAAO) is in receipt of your April 3, 1992 letter dealing with a closure plan notice of deficiency for the TA-54, Area L, Waste Oil Storage Tanks.

LAAO has been in touch with both members of the Los Alamos National Laboratory (LANL) and members of your staff (Herb Grover and Marc Sides) on this issue. A response to your letter is in the early stages of preparation. It is LAAO's concern that the response will not be ready within the thirty days required within your letter. It is the intention of LANL to submit the information required on time. Due to several issues which are putting a strain on the Environmental Management Resources at LANL at this time, it is uncertain whether the deadline can be met. To ensure that LANL does not fail to meet the time frame, a two week extension is therefore requested.

If you should have any questions concerning this situation, please call Jon Mack of my staff at 665-5026.

Sincerely,

Karl J. Twombly, Chief  
Environment, Safety & Health  
Branch
