RE: Completion of Administrative Review and Assessment of Permit
Fees for Area G TRU Storage Unit
EPA I.D. Number NM08900105151

Dear Mr. Bellows:

The New Mexico Environment Department (NMED) has completed its review for administrative completeness of the Permit Application submitted by the Department of Energy (DOE)/Los Alamos National Laboratory (LANL) for the Area G TRU Storage Unit located at Technical Area 54. The determination of administrative completeness does not include the storage tanks and skids associated with the Hazardous Waste Treatment Facility. The portion of the Application for these units will be processed at a latter date. The permit application has been determined to be complete in accordance with the New Mexico Hazardous Waste Management Regulations (HWMR-7), Part IX, 40 CFR 270.10(c). A determination of permit application completeness does not preclude NMED from requesting additional information from DOE/LANL to clarify, modify, or supplement previously submitted material. Requests for such additional information will not render an application incomplete.

Upon determination of Permit Application administrative completeness, the New Mexico Hazardous Waste Fee Regulations (HWFR-1) promulgated under authority of the New Mexico Hazardous Waste Act (Section 74-4-1 et. seq. NMSA 1979, as amended, 1989) require assessment of a permit fee. The permit fee for the Area G TRU Storage Unit is \$1,000.00. The fee assessment determination is presented in the attached Permit Fee Worksheet

and Hazardous Waste Permit Fee Assessment. DOE/LANL must pay the fee within thirty (30) days of receipt of this notice. Failure to pay the fees within thirty (30) days of receipt of this letter will result in the issuance of a compliance order or permit denial.

Upon receipt of the permit fees, NMED will begin review of the permit application for technical adequacy.

If you have any questions, please contact Ms. Stephanie Stoddard of my staff at 827-4308.

Sincerely,

Barbara Hoditschek
Program Manager
RCRA Permit Section
