Dear Mr. Todd:

The New Mexico Environment Department (NMED) Hazardous and Radioactive Materials Bureau (HRMB) has completed a review of DOE/LANL's request for an extension for submittal of the Resource Conservation and Recovery Act Facility Investigation Report (RFI Report) due June 28, 1996. Technical Area 54 (TA-54) (Material Disposal Area L MDA-L) is to be covered in this report.

NMED's review considered timeliness of request, and the Technical Areas covered in the report. Review indicates that an extension of the submission date for this RFI Report until July 31, 1996 is reasonable.

Should you or your staff have any questions concerning this extension approval please contact myself or Robert S. (Stu) Dinwiddie of my staff at the above address or by telephone at (505) 827-1561.

Sincerely,

Barbara Hoditschek

Brenda

Here are fax copies of the two letters we've received about extensions over the last several months.

The first letter deals with MDA L drilling report that you're asking about, and provided an extension until July 31, 1996. We we're working to that date when FU 5 shut down. We were working an extension of that, when we received word from the Project Office (Tracy) that the extension was already requested (and received??) in a "bulk extension request" that the Project Office sent into the State. Apparently they were requesting extensions of several reports during that time frame. Both Cheryl and I remember this bulk extension request, but neither of us saw any correspondence on it. I know that the only request/approval *we* saw was the July 31 extension.

Hope this clarifies things. Please copy this to Tracy when you talk to her about it.

Thanks,
Don
