Subject: R-40 proposed well design

TECHNICAL AREA 54 WELL EVALUATIONS  
AND NETWORK RECOMMENDATIONS  
REVISION 1

[View As Web Page](#)

Mark,

This email serves as NMED approval for installation of regional well R-40 as proposed in the figure attached to the original email received by NMED this morning (November 13, 2008 at 7:11 am). NMED understands that LANL will provide the results of preliminary sampling and any proposed modifications to the well design proposed in the above-mentioned email and this email below as soon as such information becomes available. Thanks.

Michael

**Subject:** R-40 proposed well design

Jerzy,

Attached is the R-40 well design that we discussed with you and Dave Cobrain yesterday. We propose to lengthen the upper screen (755-785 ft bgs) to capture a possible water producing zone identified in the geophysics. We are lengthening the lower screen (850-870 ft bgs) to address our uncertainty in the location of the top of the regional aquifer. Please respond to this e-mail with your concurrence. If you have additional questions or comments, please call me or Danny (667-6333).

Thanks,

Mark Everett, PG
