RE: Response to Notice of Intent to Discharge; Discharge Permit Not Required for a Dechlorinated Potable Water Discharge from the Fire Suppression System at Technical Area 55, Structure 400, AI:856 (PRD20150014)

Dear Mr. Grieggs:

The New Mexico Environment Department (NMED) received a Notice of Intent to Discharge (NOI) on October 21, 2015 for an annual discharge of approximately 10,000 gallons per event of dechlorinated potable water. The discharges are being conducted as required under the National Fire Protection Association 25 *Standard for the Inspection, Testing, and Maintenance of Water-Based Fire Protection Systems*. The notice satisfies the requirements of Subsection A of 20.6.2.1201 NMAC of the New Mexico Water Quality Control Commission (WQCC) Regulations (20.6.2 NMAC). The proposed discharges are located in Technical Area 55, Structure 400 at 35° 51' 40.20" N, -106° 18' 07.41" W, approximately 1.25 miles south of Los Alamos in Section 26, Township 19N, Range 06E, Los Alamos County.

Based on the information provided in the NOI, NMED has determined that a Discharge Permit is not required as long as the discharge is as described. A Discharge Permit is not required at this time because the information provided indicates it is unlikely that the discharge will adversely affect groundwater quality.

However, because the information provided indicates that the discharge may occur to a watercourse, you are encouraged to contact NMED Surface Water Quality Bureau at (505) 827-2795 and the U.S. Environmental Protection Agency in Dallas at (214) 665-3152 to determine whether your discharge may require a National Pollutant Discharge Elimination (NPDES) permit.

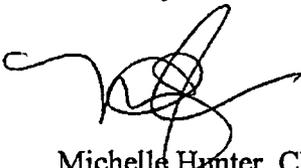

Although a Discharge Permit is not being required for this discharge at this time, you are not relieved of liability should this operation result in actual pollution of ground or surface waters. Further, this decision by NMED does not relieve you of your responsibility to comply with any other applicable federal, state, and/or local laws and regulations, zoning requirements, plumbing codes, and nuisance ordinances.

If at some time in the future you intend to change the amount, character, or location of your discharge, or if observation or monitoring shows that the discharge is not as described in your Notice of Intent, you must file a revised Notice of Intent with the Ground Water Quality Bureau.

If you have any questions, please contact either Gerald Knutson at (505) 827-2996 or Steven Huddleson, Program Manager, at (505) 827-2936.

Sincerely,

Michelle Hunter, Chief
Ground Water Quality Bureau
