Re: Reclassify DOE Permit Modification Request for the Addition of Three Hazardous Waste Management Units at LANL's Plutonium Facility to a Class 3 Requiring Public Comment, Public Hearing, and Judicial Review

Dear Mr. Kieling:

Please reclassify the recent Department of Energy (DOE) permit modification request to add three hazardous waste management units at the Plutonium Facility at Los Alamos National Laboratory from a Class 2 to a Class 3.

Clearly, DOE is proposing a significant 53 percent increase in the storage capacity at the Plutonium Facility. The request asks for a 94,545-gallon increase. The existing permitted waste storage volume is 177,887 gallons. See Attachment J-1, *Active Portion of the Facility*, to the LANL hazardous waste facility permit. DOE is proposing a 53 percent increase in storage, requiring that the request be designated as a Class 3 permit modification request. Please notify DOE that it must resubmit its request as a Class 3 permit modification request.

Thank you for your careful consideration of my request. Please include my name and contact information on the Facility Mailing List for LANL.

Sincerely,

Re: Reclassify DOE Permit Modification Request for the Addition of Three Hazardous Waste Management Units at LANL's Plutonium Facility to a Class 3 Requiring Public Comment, Public Hearing, and Judicial Review

Dear Mr. Kieling:

Please reclassify the recent Department of Energy (DOE) permit modification request to add three hazardous waste management units at the Plutonium Facility at Los Alamos National Laboratory from a Class 2 to a Class 3.

Clearly, DOE is proposing a significant 53 percent increase in the storage capacity at the Plutonium Facility. The request asks for a 94,545-gallon increase. The existing permitted waste storage volume is 177,887 gallons. *See Attachment J-1, Active Portion of the Facility*, to the LANL hazardous waste facility permit. DOE is proposing a 53 percent increase in storage, requiring that the request be designated as a Class 3 permit modification request. Please notify DOE that it must resubmit its request as a Class 3 permit modification request.

Thank you for your careful consideration of my request. Please include my name and contact information on the Facility Mailing List for LANL.

Sincerely,
