SUBJECT: Request for Extension of Time for Submittal of Unremediated Nitrate Salt-Bearing Waste Sample Analytical Results, Los Alamos National Laboratory

Dear Mr. Kieling:

The purpose of this letter is to request an extension of time for submittal of analytical results required by the Los Alamos National Laboratory (LANL) Hazardous Waste Facility Permit issued to the Department of Energy (DOE) and Los Alamos National Security, LLC (LANS), collectively the Permittees, in November 2010. Permit Section 7.6(2) and Section C.3.2.4 of Permit Attachment C (*Waste Analysis Plan*) require the collection of pre-treatment solid waste samples from six remediated nitrate salt-bearing waste containers and pre-treatment liquid waste samples from two unremediated nitrate salt-bearing waste containers. Analytical results from LANL on-site laboratory testing must be provided to the New Mexico Environment Department Hazardous Waste Bureau (NMED-HWB) within 60 days of the sample collection. The first liquid sample from an unremediated nitrate salt-bearing waste container (from container S844602) was collected on January 25, 2018.

Per Permit Section 1.9.19, the Permittees respectfully request a 10-day extension of time until April 5, 2018 in which to provide these analytical results. The sample did not arrive at the analytical laboratory for over three weeks, due to a contamination issue at the Waste Characterization, Reduction, and Repackaging Facility (WCRRF) and shipment scheduling issues due to absences. Therefore, the analytical laboratory does not anticipate finalizing analytical results until this week and additional time is necessary to transmit the report.

Mr. John Kieling
