Mr. Benito Garcia
Hazardous and Radioactive Materials Bureau
New Mexico Environment Division
Santa Fe, NM 87502

AUG 25 1993

Dear Mr. Garcia:

Subject: Los Alamos National Laboratory Meeting With NMED Personnel

On Monday, August 2, 1993 several representatives from the Los Alamos National Laboratory had the opportunity to meet with representatives from the New Mexico Environmental Division (NMED).

The primary purpose of the meeting was to discuss issues that the NMED feels will have significant impact on the operations at the Plutonium Facility (TA-55) in the next few years. This information is important because it will be used to help us plan for the future and to better use our resources. The discussion and feedback from the NMED personnel was helpful and very much appreciated.

Also during the discussions several NMED representatives expressed an interest in hearing more about the activities at TA-55.

In the spirit of increasing information exchange, I would be happy to make a presentation on TA-55 activities to the appropriate NMED personnel. I may also be able to arrange a visit into our Plutonium Facility, given sufficient notice.

Please convey my appreciation and that of my staff to Ms. Hoditschek and the other NMED staff who took time out of their busy schedules to meet with us. I hope our meeting was as beneficial to you as it was to us.

Sincerely

Bill J. McKerley
Group Leader
Nuclear Materials Technology
Nitrate Systems and Waste Management
