**Emergency Permit 17-001**

On February 23, 2017, Los Alamos National Laboratory (LANL) informed the New Mexico Environment Department (NMED) that it had an emergency involving unstable hazardous waste and requested that NMED issue it an emergency permit to treat unstable waste detonation. LANL's Emergency Response team had determined that the unstable waste posed an imminent and significant health and safety risk and was unsafe to transport. LANL is located in Los Alamos County, an incorporated county in north-central New Mexico, and approximately 60 miles north northeast of Albuquerque and 25 miles northwest of Santa Fe. LANL occupies approximately 40 square miles on the Pajarito Plateau. The U.S. Department of Energy (DOE) / National Nuclear Security Administration (DOE/NNSA) owns the facility, and the DOE/NNSA and Los Alamos National Security, LLC (LANS) operate the facility. Based on all information provided and after considering the inherent dangers associated with handling the unstable materials, NMED approved an emergency permit (17-001) on February 23, 2017 for LANL to destroy the waste pursuant to 20.4.1.900 NMAC, incorporating 40 CFR 270.61.

The unstable waste consisted of a 3/4 full 50 ml container of acetaldehyde, which field screening measurements indicated peroxide levels greater than 250 ppm. This reactive waste was deemed unstable. LANL's Emergency Response team safely moved the containers within TA-59 and detonated the waste on February 23, 2017, implementing all necessary safety precautions. No hazardous residues remained after the destruction of the waste.

partment (NMED) that it had an emergency involving unstable hazardous waste and requested that NMED issue it an emergency permit to treat unstable waste detonation. LANL's Emergency Response team had determined that the unstable waste posed an imminent and significant health and safety risk and was unsafe to transport. LANL is located in Los Alamos County, an incorporated county in north-central New Mexico, and approximately 60 miles north northeast of Albuquerque and 25 miles northwest of Santa Fe. LANL occupies approximately 40 square miles on the Pajarito Plateau. The U.S. Department of Energy (DOE) / National Nuclear Security Administration (DOE/NNSA) owns the facility, and the DOE/NNSA and Los Alamos National Security, LLC (LANS) operate the facility. Based on all information provided and after considering the inherent dangers associated with handling the unstable materials, NMED approved an emergency permit (17-002) on March 2, 2017 for LANL to destroy the waste pursuant to 20.4.1.900 NMAC, incorporating 40 CFR 270.61.

The unstable waste consisted of the following:  
"Diethyl ether (100 ml container)  
"Hydrazine (50 gm container)  
"Hydrazine acetate (10 ml container)

LANL's Emergency Response team safely moved the containers within TA-43 and detonated the waste on March 2, 2017, implementing all necessary safety precautions. No hazardous residues remained after the destruction of the waste.
