

PUBLIC NOTICE 17-03

NEW MEXICO ENVIRONMENT DEPARTMENT HAZARDOUS WASTE BUREAU 2905 Rodeo Park Drive East, Bldg 1 SANTA FE, NEW MEXICO 87505 April 3, 2017

Emergency Permit 17-001 On February 23, 2017, Los Alamos National Laboratory (LANL) informed the New Mexico Environment Department (NMED) that it had an emergency involving unstable hazardous waste and requested that NMED issue it an emergency permit to treat unstable waste detonation. LANL's Emergency Response team had determined that the unstable waste posed an imminent and significant health and safety risk and was unsafe to transport.

LANL is located in Los Alamos County, an incorporated county in north-central New Mexico, and approximately 60 miles north northeast of Albuquerque and 25 miles northwest of Santa Fe. LANL occupies approximately 40 square miles on the Pajarito Plateau. The U.S. Department of Energy (DOE) / National Nuclear Security Administration (DOE/NNSA) owns the facility, and the DOE/NNSA and Los Alamos National Security, LLC (LANS) operate the facility.

Based on all information provided and after considering the inherent dangers associated with handling the unstable materials, NMED approved an emergency permit (17-001) on February 23, 2017 for LANL to destroy the waste pursuant to 20.4.1.900 NMAC, incorporating 40 CFR 270.61.

The unstable waste consisted of a 3/4 full 50 mL container of acetaldehyde, which field screening measurements indicated peroxide levels greater than 250 ppm. This reactive waste was deemed unstable.

LANL's Emergency Response team safely moved the containers within TA-59 and detonated the waste on February 23, 2017, implementing all necessary safety precautions. No hazardous residues remained after the destruction of the waste.

Emergency Permit 17-002 On March 2, 2017, Los Alamos National Laboratory (LANL) informed the New Mexico Environment Department (NMED) that it had an emergency involving unstable hazardous waste and requested that NMED issue it an emergency permit to treat unstable waste detonation. LANL's Emergency Response team had determined that the unstable waste posed an imminent and significant health and safety risk and was unsafe to transport.

AFFIDAVIT OF PUBLICATION

STATE OF NEW MEXICO

County of Bernalillo SS

Bernadette Gonzales, the undersigned, on oath states that she is an authorized Representative of The Albuquerque Journal, and that this newspaper is duly qualified to publish legal notices or advertisements within the meaning of Section 3, Chapter 167, Session Laws of 1937, and that payment therefore has been made of assessed as court cost; that the notice, copy of which hereto attached, was published in said paper in the regular daily edition, for 1 time(s) on the following date(s):

04/07/2017

LANL is located in Los Alamos County, an incorporated county in north-central New Mexico, and approximately 60 miles north northeast of Albuquerque and 25 miles northwest of Santa Fe. LANL occupies approximately 40 square miles on the Pajarito Plateau. The U.S. Department of Energy (DOE) / National Nuclear Security Administration (DOE/NNSA) owns the facility, and the DOE/NNSA and Los Alamos National Security, LLC (LANS) operate the facility.

Based on all information provided and after considering the inherent dangers associated with handling the unstable materials, NMED approved an emergency permit (17-002) on March 2, 2017 for LANL to destroy the waste pursuant to 20.4.1.900 NMAC, incorporating 40 CFR 270.61.

The unstable waste consisted of the following: Diethyl ether (100 ml container) Hydrazine (50 gm container) Hydrazine acetate (10 ml container)

LANL's Emergency Response team safely moved the containers within TA-43 and detonated the waste on March 2, 2017, implementing all necessary safety precautions. No hazardous residues remained after the destruction of the waste.
