Reference: Work Assignment No. 06280.170.0002; State of New Mexico Environment Department, Santa Fe, New Mexico; General Permit Support Contract; Technical Review of the Veneer Stability Analyses Side Slope Cover System for The Los Alamos Site Office TA-73 Airport Landfill; Los Alamos National Laboratory, Los Alamos, New Mexico; Draft Deliverable

Dear Mr. Cobrain:

TechLaw has completed the review of the Veneer Stability Analyses Side Slope Cover System which was submitted in response to questions forwarded by TechLaw to North Wind regarding the additional information provided by the DOE and the Los Alamos National Security, LLC (Permittees) in response to NMED July 14, 2006 Request for Additional Information for Remedy Design Work Plan (Work Plan) for the Los Alamos Site Office (LASO) TA-73 Airport Landfill, Revision 2, dated April 2006.

Per your directions, TechLaw contacted North Wind and discussed issues to be addressed as a follow-up to the response provided by the Permittees to NMED Comment No. 4 regarding slope stability. Based on this review, the additional analyses provided appear to adequately address concerns with stability.

TechLaw also previously reviewed the infiltration layer test pad results and found the data presented adequate. The finding of this review was communicated to you via email on September 21, 2006.

TechLaw recommends that Permittees be asked to incorporate these two submittals in the final Work Plan.

This document is formatted in Microsoft Word. The deliverable was emailed to Mr. David Cobrain on October 2, 2006 at Dave.Cobrain@state.nm.us and Ms. Darlene Goering at Darlene.Goering@state.nm.us. A formalized hard (paper) copy of this deliverable will be sent vial mail in a few days.

Please feel free to contact me at (303) 763-7188, or Mr. Mohamed Nur, the reviewer, at (703) 818-3244, if you have any questions.

Sincerely,

A handwritten signature in black ink that reads "June K. Dreith". The signature is written in a cursive style with a large initial "J" and a stylized "K".

June K. Dreith
