Dear Ms. Maranville:

Subject: Extension Request for Submittal of Addendum to the Interim Measure  
Workplan for PRS TA 73-001(a)

The Department of Energy requests an extension to March 14, 2003 for submittal of the addendum to the Interim Measures Plan for Potential Release Site 73-001(a) as requested in your November 6, 2002 letter. In November 2002, DOE was introduced to a technology that may be well suited for this project. This technology had not previously been considered or evaluated but has the potential to offer the most practicable and safest alternative for removal of debris from this PRS. We have requested proposals and cost estimates from two contractors. Evaluation of these proposals will be completed by February 2003.

This extension will allow us time for review of these proposals and will ensure that all possible safety considerations have been evaluated. We look forward to discussing our IM plan revisions with your office prior to submittal.

Please direct any question concerning this request or this project to David Gregory at (505) 667-5808.

Sincerely,

*David R. Gregory*
