Subject: airport transfer

Hi-

I am very concerned with the current DOE plan for the Los Alamos airport remediation being submitted to NMED. The plan calls for a berm to run the length of the runway. This will make the land unusable for future use as well as constitute an extreme hazard for aircraft. This plan disregards the legislation creating the land transfers which said that the land is to be given to the county in a condition that permits economic use.

Please do all that you can to ensure that the DOE plan is amended in a way that meets the legislative intent and preserves this critical resource.

Thank you
Blaine Asay
