Discussion

I talked to Randy about Jordan's letter of 1/20/84 in which Jordan implied that EIA had OK'd the construction details of the three wells. I told him that if they put the wells into ground water to 20' depth they should be prepared to sample at discrete intervals for contamination and that monitoring of water levels should be done more frequently than once monthly. Randy said that since PNM is in charge we should tell them this directly and also let them know who is in charge of the ground water aspects (saturated and unsaturated zone). He would also like

Conclusions or Agreements

Kenn Lambert to provide them (Geoscience) with vadose zone comments on the Phase I summary so that Randy knows he is on the right track before he submits the final report (Phase III)
