CERTIFIED MAIL #P 077 872 704

Ms. Nancy Norem
Senior Engineer
Public Service Co. of New Mexico
Alvarado Square
Albuquerque, NM 87158

Dear Ms. Norem:

**Re: PERMIT APPLICATION - #353 AIR STRIPPING / VAPOR EXTRACTION
AND TREATMENT SYSTEM**

This letter constitutes a permit to Public Service Co. of New Mexico (PNM) pursuant to Section 74-2-7 NMSA 1978 and Albuquerque/Bernalillo County Air Quality Control Regulation (AQCR) 20, *Authority-to-Construct Permits*; to construct and operate an air stripping / vapor extraction and treatment system at Person Generating Station at Broadway and Rio Bravo S.E. in accordance with the application received January 10, 1994.

The Division has performed an analysis to verify the emissions from the facility and dispersion modeling to determine the impact on the ambient air. Based on this analysis and the control measures described in your application, the Division has determined that the provisions of the Air Quality Control Act, the Albuquerque/ Bernalillo County Air Quality Control Regulations and Federal, State and Local regulations and ambient air quality standards will be met. However, in order to assure this, the following conditions have been placed on the permit.

1. Total emissions from all sources at the site shall not exceed 0.75 pound per hour of non-methane hydrocarbons including no more than 0.375 pounds per hour of 111-TCA, 0.375 pounds per hour of PCE and 0.003 pounds per hour of 11-DCE.
2. All roadways, loading and unloading areas and other areas used by vehicles within or associated with the site, shall be watered and/or otherwise treated to prevent fugitive dust emissions.
3. If the total disturbed area of the site exceeds 0.75 acres a topsoil disturbance permit must be secured, pursuant to Regulation 8 of the Albuquerque/Bernalillo County Air Quality Control Board

Section 74-2-7 "J" NMSA 1978, states that the issuance of a permit does not relieve any person from the responsibility of complying with the provisions of the Air Quality Control Act and any applicable regulations of the board. Any conditions placed upon a permit by the Department shall be enforceable to the same extent as a regulation of the Board.

Section 76-2-7 "K" NMSA 1978, provides that if the Division issues a permit with conditions, and if the applicant is dissatisfied with the action taken by the Division, the applicant may

request a hearing before the Albuquerque/Bernalillo County Air Quality Control Board. The request must be made in writing to the Director of the Environmental Health Department within thirty days after the receipt of the permit.

AQCR 20.09 provides that the Division may cancel this permit if the construction is not commenced within one year from the date of issuance, or if during the construction work is suspended for a total of one year.

AQCR 20.10 requires the permitted source to notify the Division in writing of:

- A. The anticipated date of the initial start-up of a source not less than thirty days prior to the projected date;
- B. actual date of initial start-up of a source within fifteen days after the start-up date;
- C. change of owner or operator within fifteen (15) days of any such change, if any.
- D. an updated emissions inventory for the source together with descriptions of any reconfigurations of process technology and air pollution control equipment, every two years from the date of issuance of this permit. A letter indicating that no such change has occurred, if such is the case, shall be sufficient to comply with this requirement.

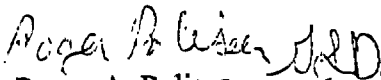

AQCR 20.11 requires a performance test conducted within sixty days after achieving maximum production, but not later than 180 days after initial start-up. The department shall be notified at least two weeks prior to the test so that our observer can be present during the test. For the purposes of this permit the department is requesting 2 (two) tests of the emissions from this site. The first should be performed during the initial few days of operation to determine maximum emission potential and the second should be performed after the site has stabilized into its long-term emissions configuration.

The permit and conditions apply in the event of any change in control or ownership of the facility. In the event of any such change in control or ownership, the permittee should notify the succeeding owner of the permit and conditions.

Thank you very much for your cooperation with the Division. If you have any questions, please feel free to call me at 768-1957.

Approved and issued this 16th day of March, 1994.

Sincerely,

 Roger A. Polisar
 Environmental Health Specialist II
 Air Pollution Control Division
