ENTERED

**NOTICE**  
**Notification of Class I Permit Modification**  
**Post-Closure Care Permit NMT360010342**  
**Public Service Company of New Mexico Person Generating Station**

This letter will serve as notification of a Class I Permit Modification to Resource Conservation and Recovery Act (RCRA) Hazardous Waste Facility Post-Closure Care Permit No. NMT360010342 for the Public Service Company of New Mexico (PNM) Person Generating Station.

The permit has been modified to reflect the replacement of monitoring well PSMW-08A, which no longer produces sufficient water volume for sample collection, with adjacent monitoring well PSMW-08B. The replacement monitoring well, PSMW-08B, is similar in construction and purpose to PSMW-08A, which is to monitor the water quality characteristics of the shallow groundwater zone. The relevant sections of the permit have been revised to replace references to PSMW-08A with PSMW-08B.

In accordance with New Mexico Administrative Code, Title 20, Chapter 4, Part 1, Subpart IX (i.e., 20.4.1.900 NMAC), incorporating Title 40 of the Code of Federal Regulations, Part 270.42(a), these changes took effect on August 23, 2013.

These changes do not substantially alter the permit conditions (see 20 NMAC 4.1.900, incorporating 40CFR 270.42(d)(2)(i)) and do not reduce the ability of PNM to protect human health and the environment.

Questions regarding this permit modification may be directed toward either of the following contacts:

Public Service Company of New Mexico Contact: John Hale, 505-241-2014.

New Mexico Environment Department Contact: Brian Salem, 505-222-9576.
