RE: Person Generating Station (NMT 360010342) – Completion of Post-Closure Care Certification

Dear Mr. Kieling:

In a letter dated September 7, 2018, New Mexico Environment Department (NMED) determined that corrective action for the Person Generating Station is complete. Therefore, in accordance with NMAC 20.4.1.500 (incorporated by reference 40 CFR 264.120), Public Service Company of New Mexico (PNM) hereby submits this letter certifying that post-closure care activities have been completed in accordance with Post-Closure Care Permit No. NMT 360010342 for the Person Generating Station.

In support of the certification and as required by the above-referenced regulations, PNM has submitted the following documents to NMED.

- Final Groundwater Monitoring Report (*Second Half 2017 Semi-Annual Report*) dated January 10, 2018.
- Class 3 Permit Modification Request Petitioning for Corrective Action Complete (*Class III Permit Modification Request to Terminate the Post-Closure Care Permit*) dated April 11, 2018.

PNM understands that upon receipt of this certification letter, NMED will terminate the Person Generating Station RCRA Post-Closure Care Permit and release PNM from the financial assurance requirements associated with this permit.

Please contact John Hale of my staff at (505) 241-2014 or via email at john.hale@pnmresources.com should you have questions or require additional information regarding this matter.
