1190 St. Francis Drive
P.O. Box 26110
Santa Fe, NM 87502

Dear Ms. Hoditschek,

I received your letter dated January 20, 1993, and wish to ask for an extension, until February 19, 1993, to complete the items you have requested in the letter. To get you an IBM-compatible disc of the permit will take the two weeks. We are having to download from a DEC computer to an IBM desk top.

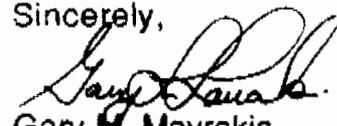

You should be receiving a letter from North American Philips Corporation which should address item #3 in your letter. If you need more information from them, please let me know.

Item #2 will be on the IBM disc and we are presently compiling the info needed for item #1. In addition, I spoke to Stephanie Stoddard, of your office, on the Chemical Safety Training Manual and explained that we sent copies of all our manuals to your organization over two years ago. However, I will compile all the manuals and send you additional copies.

For the record, we having been working, with the State, on this permit modification since 1991. I am hoping we can resolve all the issues and get the permit revised. Very soon we will have to renew the permit. If I'm not mistaken, our permit is up for renewal in 1995.

Thanks for all the help to accomplish this task and especially thank Stephanie Stoddard, as she has been an angel over the last two years. She is very helpful!

Sincerely,

Gary M. Mavrakis
Environmental Manager
