

MEMORANDUM

TO: The Files
FROM: Stephanie Kruse SK
SUBJECT: Meeting with Philips
DATE: January 3, 1995

I met this morning from 10-11:30 with Jim Cochran, Manager of Environmental, Health & Safety for Philips Semiconductors. The following items were discussed:

1. We went over final corrections to and made final decisions regarding the permit modifications.
2. I went over certain items listed in the 270.42 table identifying mod classifications. These items were ones that I thought might bring in Class II mods (a decrease in frequency of inspections, etc.) We are agreed that there are no Class II mods in this permit request.
3. I discussed what is expected of the permittee regarding public participation.

Jim Cochran also said:

4. Due to changes in the last six months resulting in expected future expansion, Philips does not wish to proceed with closure of its RCRA permit during 1995. It will therefore be up for a permit renewal by April 1996.
