**SUBJECT: Philips Semiconductors (NMD000709782) - Notification of Groundwater Well
#MW-3 Closure.**

Dear Ms. Olson:

As part of our new groundwater monitoring well installation project, we are planning on closing the Philips Semiconductors groundwater monitoring well MW-3. This monitoring well is no longer being sampled due to the water table dropping below the well bottom. When samples were collected from this well in the past, no contamination was identified. The well casing will be filled and associated structures removed at ground level. A new monitoring well (MW-6) will be located adjacent to the MW-3 well at a deeper level and will continue monitoring the groundwater in this location. Please let me know if further information or submissions are required for the closing of this well.

If you have any questions regarding this notification, I can be contacted at (505) 822-7342.

Sincerely,

David Paulson
Environmental Section Head
