CERTIFIED MAIL RETURN RECEIPT REQUESTED

Mr. Edward L. Horst
RCRA Program Manager
Hazardous and Radioactive Materials Bureau
State of New Mexico
Environment Department
Sante Fe, New Mexico 87502

RE: Submittal of permit modifications for Safety-Kleen
Albuquerque and Farmington NM.

Dear Mr. Horst:

Recent telephone conversations with Marcus Sides of your staff brought up the following about these requests referenced submitted to you June 30, 1992:

1. The determination of the modifications whether they are major and minor will not be made until at least October 1993(FY 94).
2. The review of these modifications will not be made until after number one (1) item is completed. This could delay final issuance of these modification to calendar year 1994.
3. The modification request was made June 30, 1992 and we did not hear from anyone about when this would be reviewed until December 1992.
4. Marcus Sides at that time told me a letter would be sent to us saying that they would determine if the modifications would be minor or major.

The major modifications noted for each facility stated in the letters submitted to you I would like acted upon sooner than the schedule that was told to me.(One class two modification for Farmington and a class three and two class two modifications for Albuquerque.) The balance of the changes are minor in nature and could be addressed later.

We would be glad to meet with you on these matters or if you would like to talk to me by phone please call me at 303-322-7328.

Sincerely,

Robert P. Wachsmuth
