Joe Herrin  
Senior Project Manager - Remediation  
Safety-Kleen Corp.  
1000 North Randall Road  
Elgin, Illinois 60123-7857

Dear Mr. Herrin:

**RE: Closure Certification Acceptance  
Safety-Kleen Albuquerque Service Center**

On June 1, 1994, the New Mexico Environment Department (NMED) received a Closure Certification Report for Partial Facility Closure of the Safety-Kleen Corp. (SK) Service Center located at 2720 Girard NE, Albuquerque, New Mexico. NMED received additional information on the Report from SK on June 15, 1994.

The Closure Certification Report contains information on closure activities for one 12,000 gallon steel underground storage tank used for storage of spent mineral spirits and a two-bay return and fill station with two wet dumpsters (capacity 375 gallons each). The Closure Certification Report also documents activities in the closure plan approved by the NMED on May 7, 1993.

The NMED hereby accepts the SK Closure Certification Report for Partial Facility Closure as meeting the closure requirements approved by NMED on May 7, 1993. Documentation in the subject report demonstrates that clean closure of the unit was accomplished. No further closure or post-closure activities may be required for this hazardous waste management unit under the New Mexico Hazardous Waste Management Regulations (HWMR-7).

Sincerely,

A handwritten signature in cursive script that reads "Kathleen M. Sisneros".

Kathleen M. Sisneros, Director  
Water and Waste Management Division
