6. The method of transfer, treatment, storage, or disposal for each hazardous waste: All used parts washer solvent is pumped to a UST on the Safety-Kleen site, then shipped for reclamation at the Safety-Kleen Systems, Inc. Dolton, Illinois recycling facility. Hazardous and nonhazardous solvent is bulked into the same tank and undergoes the same recovery process.
7. If applicable, the certification signed by the owner or operator of the facility or the facility's authorized representative: See attached certification and bill-of-lading.
8. Brief explanation of why the waste was unmanifested: Material has been designated as nonhazardous since 2011. This shipment had one drum pulled for random sampling per the Safety-Kleen Part B permit. Analytical from a certified lab showed the drum of solvent had 32,000 mg/L of tetrachloroethylene.
