PUBLIC NOTICE No. 41

January 7, 1991

NOTICE OF INTENT TO
GRANT A PERMIT FOR THE
OPERATION OF A HAZARDOUS WASTE STORAGE FACILITY
SAFETY-KLEEN CORPORATION,
FARMINGTON, NM

The State of New Mexico is authorized to operate a hazardous waste management program in lieu of the Federal program for those portions of the Resource Conservation and Recovery Act (RCRA) in effect prior to the Hazardous and Solid Waste Amendments of 1984 (HSWA). The HSWA impose additional requirements on hazardous waste management facilities, and these requirements will be administered and enforced by the U. S. Environmental Protection Agency (EPA) until the State of New Mexico receives authorization for those requirements.

Under the authority of RCRA, the Environmental Improvement Division (EID) of the New Mexico Health and Environment Department, and EPA Region 6, propose to issue a permit to the Safety-Kleen Corporation for the storage of hazardous waste in containers and in a tank at its facility located at 4200A Hawkins Rd., Farmington, NM. The portion of the permit issued by EID is issued under the authority of the New Mexico Hazardous Waste Act (Section 74-4-1 et seq. NMS, 1978, as amended 1989), and the portion of the permit issued by EPA is issued under the authority of the Resource Conservation and Recovery as amended by the Hazardous and Solid Waste Amendments of 1984 (HSWA). The Safety-Kleen Farmington facility has been assigned the EPA identification number NMD 380698849.

The EID portion of the proposed permit contains conditions regulating the storage of hazardous waste in a 12,000 gallon aboveground tank and in a warehouse building, both located at the address given above. The facility is operating at present under interim status. The hazardous wastes stored at the facility are spent mineral solvent; immersion cleaner solvent containing (among other ingredients) methylene chloride, cresylic acid, and dichlorobenzene; an spent dry cleaning solvent comprised of perchloroethylene and trichloro trifluoroethane. All these solvents are shipped from Safety-Kleen's Farmington facility to a recycling facility in Denton, Texas.

The EPA portion of the permit will implement the requirements imposed by HSWA, such as waste minimization, land disposal restrictions, corrective action for continuing releases, and emission standards for process vents and equipment.

The administrative record for this decision consists of a fact sheet, Safety-Kleen's permit application, and related correspondence. The draft permit and the administrative record may be reviewed at the office of the Hazardous and Radioactive Waste Bureau at 1190 St. Francis Dr., Santa Fe, NM. The fact sheet and draft permit may be reviewed at the Farmington Public Library, 100 W Broadway, Farmington, NM; or at the EPA Region 6 library, 1445 Ross Ave Dallas, TX. To obtain a copy of the administrative record or any other part thereof at 35 cents per page, contact:

Mr. David Morgan EID-Hazardous and Radioactive Waste Bureau 1190 St Francis Dr. Santa Fe, NM 87503 505-827-0170

Any person who wishes to comment upon the proposed permit or to request public hearing must submit written comments or requests, including the commenter's name and address, to the address given above. Requests for a public hearing must state the nature of the issues to be raised at the hearing. Only comments and/or requests received before February 21, 1991 will be considered. The State of New Mexico will receive comments or requests for hearing regarding the HSW conditions for EPA. These comments or requests may also be sent directly to EPA at the following address:

Mr. Bill Honker, Chief RCRA Permits Branch U. S. EPA Region 6 (6H-P) 144 Ross Avenue Dallas, TX 75202

All written comments submitted on the proposed permit will be considered in formulating a final decision. EID and/or EPA may modify the draft permit based on the comments received. EID will notify Safety-Kleen Corporation, and each person who submitted a written comment during the public comment period, of the final decision or of any public hearing that may be scheduled. EPA may participate in any public hearing if one is held.

If, after consideration of all written comments, this proposed action becomes a final decision, EID and EPA will issue a RCRA permit to Safety-Kleen. This permit will regulate activities conducted by the Safety-Kleen facility in Farmington and will require that all the activities comply with applicable State and Federal law, as well as with the terms of the permit.

This Notice satisfies the requirements of the Resource Conservation and Recovery Act, as amended, 42 U.S.C. 6901 et seq., and 40 CFR 124.10. The EPA portion of the final permit will implement the requirements of the Hazardous and Solid Waste Amendments of 1984 (HSWA) to the Federal Solid Waste Disposal Act, as amended. The State of New Mexico and EPA have entered into a joint permitting agreement whereby RCRA permits may be issued and enforced by the State in accordance with the New Mexico Hazardous Waste Management Regulations until the State receives authorization under RCRA to administer the requirements of the HSWA. Until that time, the HSWA requirements will be issued and enforced by EPA. All permit terms are also enforceable by EPA. In order for the applicant to have a fully effective RCRA permit, both EID and EPA must issue the permit.

Legal No. 27038 published in the Farmington Daily Times, Farmington, New Mexico on Monday, January 7, 1991.
